

Piko Frame

# Range of diverse variations Piko Frame

Are you looking for a piece of furniture that keeps you warm and meets your needs in terms of shape and equipment? The modular system stove Piko Frame has got you covered. Its wide range of basic variations (44 different shapes and attachments) offers the perfect design for any room! As the colour of all components can be freely selected and numerous filling options are available, you can adapt the appearance of your dream stove and turn it into a personalised piece of furniture.

Everything is tailored to your requests and completely unique, nothing comes straight off the rack!

The delicate-looking frames lift the stove to the right position, guaranteeing that the flames will flicker right at eye level. As you can choose your filling options (wood store, storage compartments and covers), you can also customise the frame in the colours Nero, White, Pearl and Titanium. Together with the high-quality natural stone seats, this piece of furniture offers exciting colour combinations and a high degree of practical functions, making this stove a real visual highlight.

Model series 1 | Piko Frame 1.2 and 1.4

Example of Piko Frame 1.2 with wide shelf on the right and Piko Frame 1.4 with narrow shelf on the right:

Filling options, such as a wood store and storage compartments with a swing door can be used to design your very own stove just as you wish.

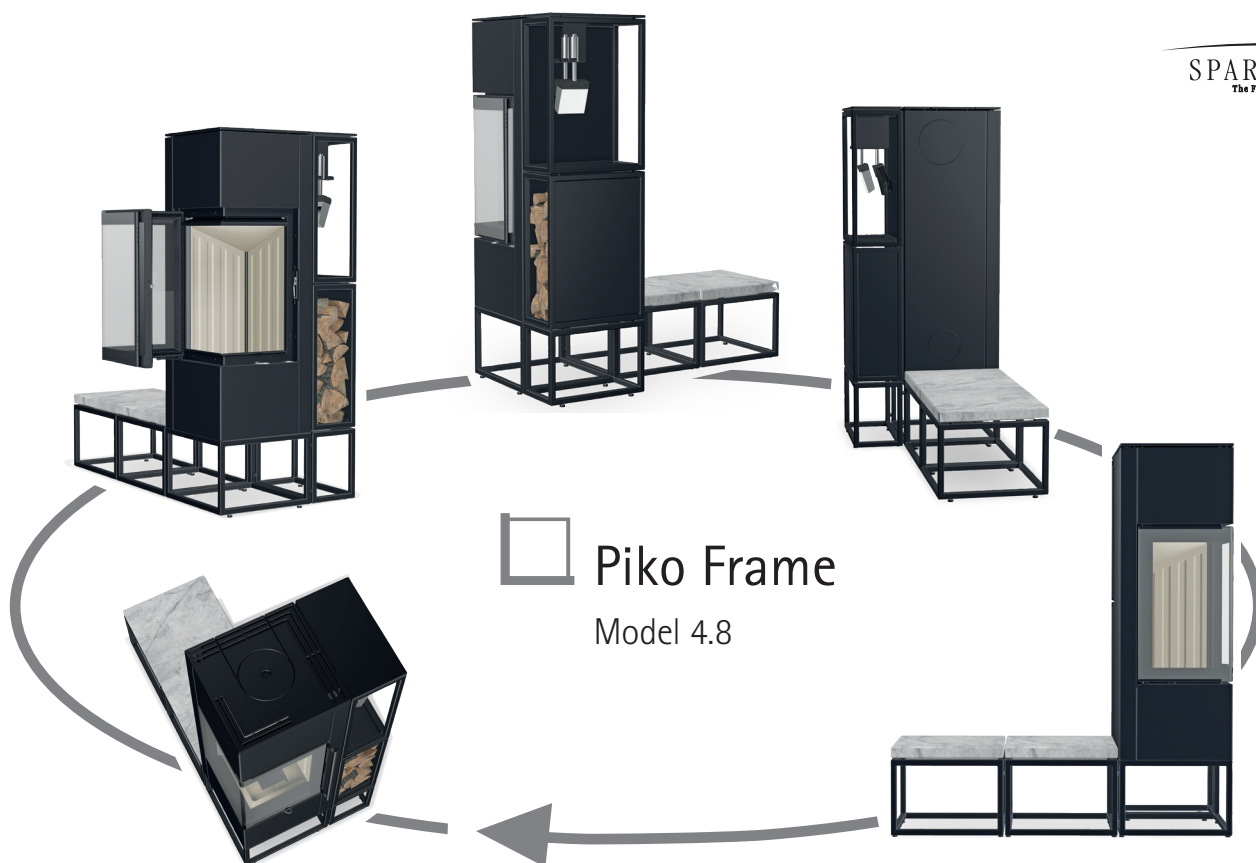

Model series 1 | Piko Frame 4.8

Example of Piko Frame 4.8 with narrow shelf on the right and stove-side seat at the back.

This combination shows the Piko Frame 4.8 in Titanium, the frame in White and the seat support in light polished Carrara marble.

The top shelf compartment houses the fire irons and can be accessed from all sides. The bottom shelf compartment is designed as a wood store for easy refilling.

Black

## Piko Frame model series 1

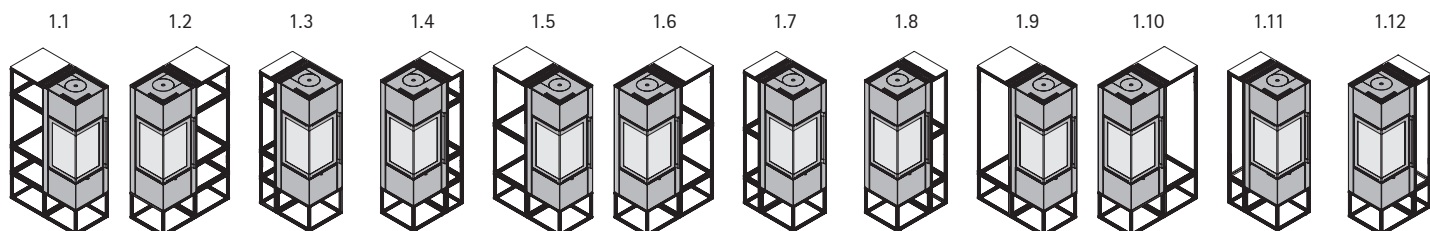

### Simply practical storage space for wood and accessories

Thanks to both narrow and wide shelves, the model series 1 offers plenty of storage space for your home. Customers have a free choice of one, two or three storage compartments and any corresponding accessories. Piko Frame models 1.1 to 1.12 can be installed against a wall or as a room divider.

Wood stores and shelf compartments can be constructed through insertable shelves and covers. Moreover, some shelf elements provide space for accessories such as fire irons or oven mitts.

## Piko Frame model series 2 – Relaxing on a seat by a cosy fire

Model series 2 offers seats on one or two sides of the stove. Underneath the seating areas, filling options can be used to create additional storage space.

The natural stone seat supports are available in either light polished Carrara marble or dark Granite Nero. This model opens up fascinating design options for corners of living spaces, as you can place it in the corner or around a corner.

## Piko Frame model series 3 – Both storage space and seating area

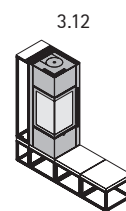

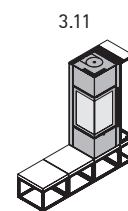

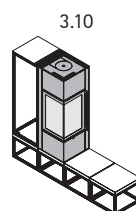

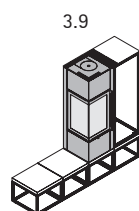

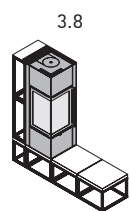

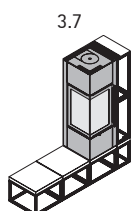

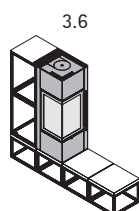

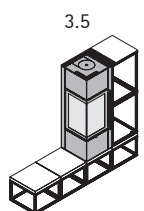

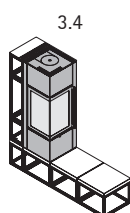

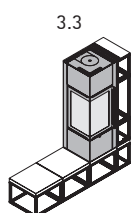

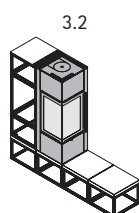

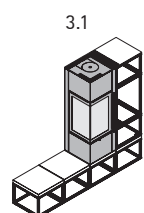

If you are looking for both storage space and a stove-side seating area, model series 3 and 4 are the perfect solution.

In model series 3, the seating area and shelf can be attached on the side.

The natural stone selected for the seat support is also used to decorate the stove and shelf base. Depending on the connection, this model version is either installed against a wall or acts as a room divider.

### Overview of Piko Frame model series 3

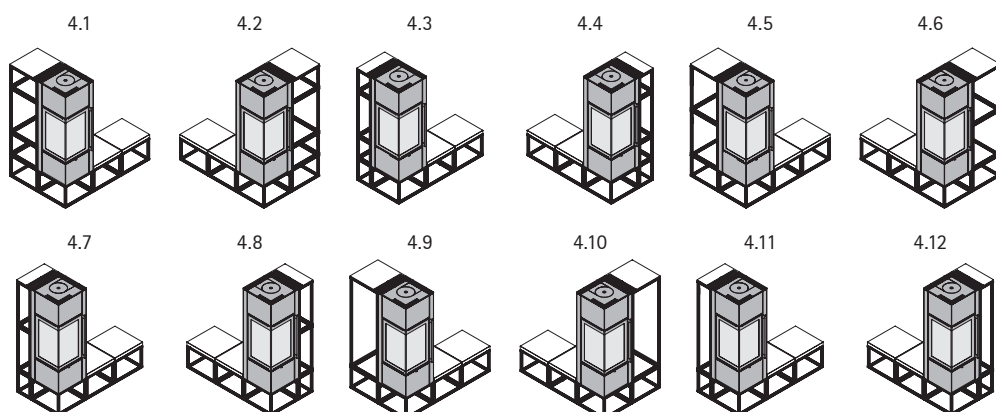

## Piko Frame model series 4 – Shelf and stove-side seating area across a corner

The model series 4 is ideal for building around a living space corner.
