FLAMING PASSION FOR FIRE

Innovative technology in
timeless design

Warmth, cosiness and atmosphere: A fireplace is at the top of many people's wish list. To turn this wish into reality, Spartherm offers a wide range of innovative fireplace inserts with which any architectural design can be realised. Visually, the innovative fireplace inserts impress with generous glasses that offer a unique view of the flames. In addition to fireplace inserts with a frontal glass, Spartherm also offers L-shaped or U-shaped variants, among others. Individual wishes can be realised with the right combustion technology from Spartherm. Since the company was founded in 1986, Spartherm has been continuously developing and implementing innovations to improve fireplace inserts and offer the perfect feel-good moment.

FIREPLACE INSERTS

WHAT IS
FASCINATING
ABOUT A
SPARTHERM
FIREPLACE INSERT?

**UNIQUE DESIGN,
JUST AS YOU
WANT IT**

**INNOVATIVE
PRODUCTS FOR
EVERY STYLE OF
LIVING**

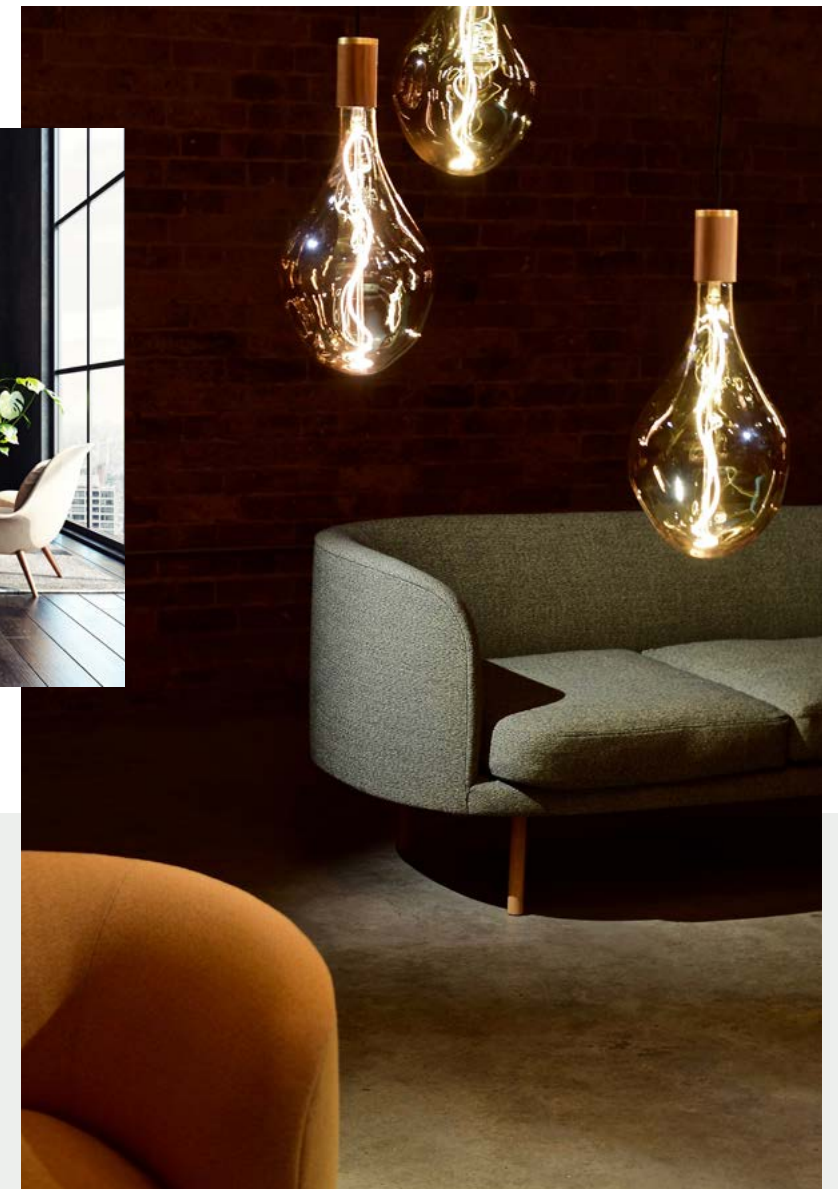

**AN INDIVIDUAL
FIREPLACE
EXPERIENCE,
FOR A LIFETIME**

LIVING STYLES – THE FIRE FOR EVERY STYLE

Whether minimalism, industrial chic or Skandi style:
Furnishings that focus on design and quality are in vogue.

No wonder: If you limit yourself to the essentials in your own four walls and remove superfluous items, order and peace will return. This provides relaxation and helps make things slow down. High-quality design classics suit this living trend well; they are durable and thus sustainable by nature. Like the fireplace inserts from Spartherm.

The new furniture is here, but is it still missing that certain something? Without a dash of naturalness, many living styles seem cold and impersonal. It's the little things that turn a new house into a cosy home. Warm, natural materials such as wood or leather. Beautiful fabrics, cushions and plaids. Pictures and books. Lovely colours that create a sense of well-being. But nothing gives an interior as much power and cosiness as a fireplace. Because it's the warmth and special atmosphere of a fireplace that really makes the living ambience radiate! Spartherm fireplace inserts offer an almost inexhaustible variety of creative possibilities. So that the dream fireplace becomes reality.

MINI

STRAIGHT

Sophisticated, yet compact

Mini Z1

If you want to set visual highlights in unusual places, you will find a flame for all occasions in the Mini fireplace insert. Because with its compact dimensions and perfectly well-developed technology, the Mini offers exceptional fire enjoyment. Thus, this fireplace insert with its self-closing hinged door not only ensures maximum safety, but can also be optimally installed at a low height, such as under a staircase. The Mini thus represents a successful symbiosis of functionality and design – small but mighty!

MINI

STRAIGHT

Small fireplace -
great effect

The fireplace crackles gently and invites you to linger. With a Mini, you can still create a lively highlight in the smallest room. Because a genuine fire in a fireplace is an upgrade for any ambience. So this fireplace insert, which is not too big and yet combines functionality and design, will find the perfect space for an unforgettable fire experience even in a corner or on a narrow wall.

In addition, the smart fireplace assistance functions ensure a relaxed fire experience. The electric S-Thermatik NEO, for example, enables the wood to burn efficiently and a underpressure control offers even more safety. With the electric, automatically operating sliding door called S-ESAM, operating the Mini becomes extremely convenient and leaves more time for enjoying the fire.

Simply change the perspective

New insights. For those who want to enjoy the fire again and again in a different way, the L-shape of the Mini is the ideal entry-level format for corner fireplaces. The practical Mini 2L or Mini 2R with self-closing hinged door, for example, is especially suitable for low installation situations. As a convenient Mini 2LRh with an elevating door, the front can even be opened with the S-ESAM electric glass opener if desired.

The L-shape creates a holistically designed ambience for well-being that can be viewed from two sides.

MINI

DOUBLE SIDED

Connect compactly

Open, yet separate. If you are looking for the perfect solution to design rooms in a unique way, you will find the answer in the “double sided” Mini. Because the compact fireplace from Spartherm provides a clear view all the way through it. The fireplace insert with its two glasses is cleverly integrated into the architecture.

This creates an almost natural connection between two rooms. Because the warming fire always remains and fascinates from every angle. This allows you to enjoy open perspectives even in compact room situations – for more space and a special fire experience.

The special format

Arte 2LRh-66

With understated elegance, the fire feature is presented in this variant of the Arte from Spartherm. As the two identical fronts form a slim silhouette for the generous combustion chamber. This allows the flames to develop imposingly and show greatness. Because the blazing fire is visible at full height and from two sides in the Arte 2LRh-66.

The sophisticated technology of the firing system also convinces with its impressive performance. As with an output of 6.4 kW, the energy level remains pleasant and does not overheat the room. In the Arte fireplace insert, Spartherm combines innovative technology and unique design to create unforgettable fire enjoyment.

This impression is further enhanced when the door glass can be opened like a theatre curtain with the optional electric S-ESAM lift. The Varia models also unfold their warming effect in other rooms. Because their energy through warm air can then be felt throughout the house – cosy and warm.

VARIA H₂O

STRAIGHT

Fire and water

Varia Ah H₂O

The wood in the Varia H₂O crackles quietly and flares up every now and then. After a while, the cosy warmth in front of the fireplace insert beckons and, with a view of the lambent fire, pure relaxation begins. But these special models of the Varia series do not only light up the eyes thanks to the unique pattern of fire, they also inspire with their technical finesse.

In this way, the innovative H₂O models produce sustainable and CO₂-neutral hot water that can be used in all areas of the entire home. This is made possible and supported by the digital S-Thermatik NEO. In the process, the different variations of the fireplace insert, which are fueled with well-stored logs, always achieve energy efficiency class A in the tests – with the best prospects for the environment.

Flaming perspectives

Warmth and a feeling of security. That is why a place by the fire has been coveted since time immemorial. The sophisticated L-shape of the Varia H₂O with its compact corner glass allows a comprehensive view of the flames from two sides. This way, the pattern of fire remains in view at all times. The ingenious corner solution opens up new dimensions for a unique interior design because the fireplace insert can be placed unattached and freely in the room.

All Varia corner fireplace models have another advantage. This is because they can also pass on their power to other rooms through warm air. The digital S-Thermatik NEO assists in handling the fire just right. The water-conducting variant is particularly designed for sustainable consumption of resources. This is because it also generates hot water that is produced in a CO₂-neutral way – with the fire of innovation.
